NZC Traffic Incident Management

This course is designed to recognise the skills needed to keep NZ roads, and road users, safe in the event of an incident.

WHAT YOU'LL LEARN

This programme covers:

- Assessing risks to ensure the safety of first responders and other road users during a traffic incident.
- Responding, monitoring and adjusting traffic incident response to reduce incident duration and restore normal traffic flow as soon as is safely possible.
- Completing documentation and post incident procedures to re-open a traffic incident site.

HOW THE COURSE IS DELIVERED

On-job assessment through workbooks which are printed and provided to you.

It can also be achieved through Advanced Portfolio Assessment (APA). If the learner has a minimum of 4 years experience working in the industry, and can provide a portfolio of evidence from the past 24 months linking to the level of this programme's unit standards, then APA could be a great option to recognise existing skills.

ENTRY REQUIREMENTS

The learner must be employed in the traffic incident management industry and be exposed to the relevant skills covered.

TRAINING PATHWAYS

Graduates will be able to operate under limited supervision within a traffic incident management team.
