NEW ZEALAND APPRENTICESHIP
IN ELECTRICITY SUPPLY

Network Control

Skills Covered:

- Operating equipment to isolate, connect, control and monitor the electricity grid and distribution system.
- Ensuring asset owners' specifications are met during network plant operations.
- Monitoring and responding to unforeseen, abnormal fault events.
- Meeting network company and customer performance standards.
- Planning network shutdowns.
- Operating SCADA and Load Control systems.
- Communicating with Transpower and Customers.

Entry Requirements:

The learner must be employed in the electricity supply industry and exposed to the relevant skills covered.

Progression Pathways:

This programme can lead into the NZ Certificate in Electricity Supply (Distribution Live Line Glove and Barrier) (Level 5).

Modes of Delivery:

This programme is assessed on-job through a mixture of theory and practical assessment, or off-job through a provider. This qualification requires an in-house company mentor to source relevant company resources. Material used as evidence for assessment requires you to provide company process evidence examples in the form of:

- Logs, permit transactions
- Equipment operating transactions, instructions
- Communication scripts with stakeholders
- Network Shutdown planning
- Fault analysis, response, management
- SCADA operations, printouts
- Load management profiles, graphs, operations

It can also be achieved through Advanced Portfolio Assessment (APA). If the learner has a minimum of 4 years experience working in the industry, and can provide a portfolio of evidence from the past 24 months linking to the level of this programme's unit standards, then APA could be a great option to
