Programme and Delivery Proposal

New Zealand Certificate in Water Services Level 3					
Credits	40	NZQA#	5674-1	Duration	6 Months

Strands

At least one of the following strands is required:

- Drinking Water
- Wastewater

How is this programme proposed to be completed?

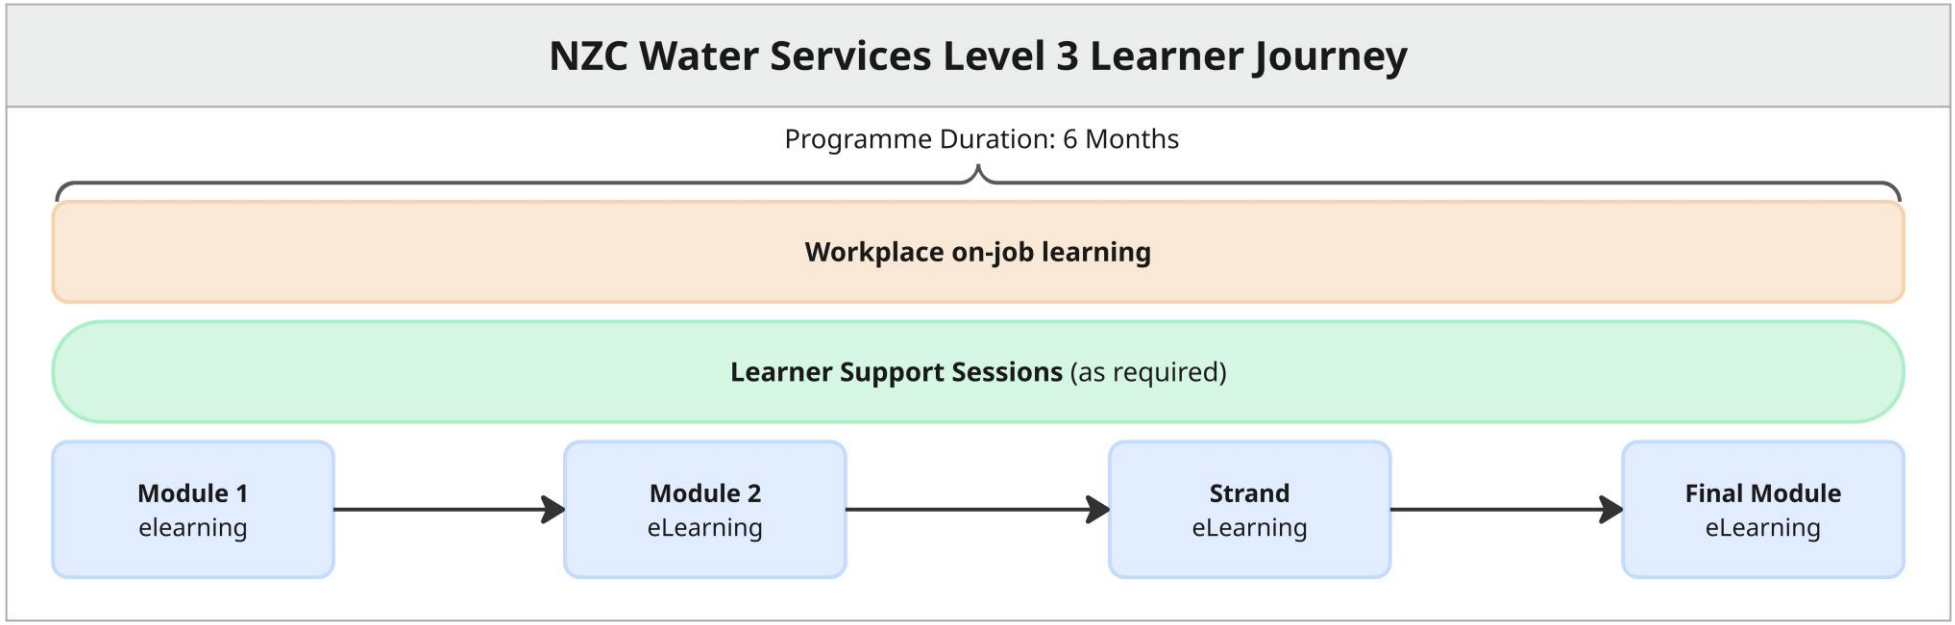

eLearning would be required to complete this programme.

eLearning	Online learning and a combination of theory and practical assessment that are completed using the Connexis eLearning system (LMS). Practical assessments focus on real work activities completed on-job with evidence uploaded to support the assessment.
Learner Support Sessions	In addition to the learning and assessment methods above, learners are also supported by Connexis through our Learner Support sessions. These sessions may be 1:1 or in a group, they help to build learner confidence, strengthen understanding and provide the support learners need to succeed. Support is tailored to each learners needs but may include tutoring on specific topics or skill standards, coaching, guidance or encouragement to keep learners progressing. For more information, please visit the Connexis website here.

Proposed Programme Entry Requirements

Learners **must** be employed in the water services industry and have enough exposure to gain the relevant skills covered within this programme.
